## Note

Colour combinations will vary from those shown in this catalogue and are unique for each boat we produce. Variations in colour are not covered by warranty.

Polyethylene expands and contracts with changes in temperature and humidity. Actual dimensions can vary from those shown in the comparison chart due to moulding process and/or exposure to extreme hot or cold temperatures. Slight variations are not covered by warranty. Specifications and features are subject to change. Spraydeck sizing figures are for Palm Equipment's range of spraydecks. Fit may depend on mould.

## Proven tough plastic

Dagger Europe kayaks are moulded in EXL Super-linear plastic because of its unrivalled strength to weight ratio, abrasion resistance and durability. We use only the highest quality components including corrosion resistant brass inserts, 100% stainless steel screws, nuts and bolts. Each boat is pressure tested and checked for thickness in over twenty places with quality checkpoints after moulding, fitting and packaging.

## Our plastic commitment

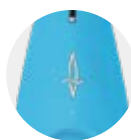

The Dagger UK factory is part of Operation Clean Sweep, an international program to control plastic waste materials and to keep them out of the environment. We recycle the waste material from our kayak production.

## Quality workmanship

We know quality is what you value – we've been making kayaks and canoes since 1979. At our state of the art rotomoulding factory we use only the best components, including moulded in brass inserts and stainless fittings. Every boat is hand finished and quality checked during moulding, fitting and before packing.

## Islander's plastic commitment

The Islander factory is part of Operation Clean Sweep, an international program to control plastic waste materials and to keep them out of the environment.

- We recycle the waste material from our kayak production.
- Through our partner, Odyssey Innovation, we produce the first kayaks made from marine recycled plastic, collected from the beaches and coastline of Cornwall, UK.

## Superior plastic

Our kayaks are made from high density polyethylene plastic. From over twenty years of experience we can say this is the best plastic with a mix of high impact strength and good shape retention, it's also repairable and recyclable. All of our waste plastic is recycled and used again in the Fiesta Recycled model.

## Outfitting

### Lash points

Islander kayaks have moulded in brass inserts for attachment of handles and lash points. These fittings are fully watertight, and keep the boats adaptable and durable.

### Adjustable skegs

The Islander Approach, Jive, Salsa, and Bolero come with adjustable drop down skegs to help keep you paddling straight, which are easily operated from the cockpit. They are made of aluminium for a durability.

### Dual density hatches

Several models in the Islander Kayaks range are fitted with dual-density rubber range are fitted with dual-density rubber hatches. A hard centre holds the shape and protects against implosion, and the softer compound outer makes a watertight seal on the boat.

### Screw hatches

Some models feature easily accessible hatches for items like snacks or sunglasses. These watertight hatches feature a pull out bag so items are easy to find.

## Surf Backrest

12429

This low profile backrest is made from thermoformed foam with a reinforced back section. It attaches to the deck of your boat's D-ring attachment points with corrosion resistant steel clips, mounted at four points for stability. The seat angle can be adjusted with webbing strap buckles.

## Deluxe Backrest

12427

This Deluxe Backrest is made from thermoformed foam with contoured seat pad and a reinforced back section. It attaches to the deck of your boat's D-ring attachment points with corrosion resistant steel clips, mounted at four points for stability. The seat angle can be adjusted with the webbing strap buckles.

## Paddle Leash

10513

Safely put your paddle down for having a rest or to take a photograph without risking to lose your sole means of propulsion.

## Angler accessories

Alongside the ready to go Strike Angler, other Islander kayaks are easily converted for angling. We supply Scotty compatible components and anchor kits to customise boats with your own fishing setup.

## Features

### Triple Tough (TT)

Mad River's proprietary polyethylene triple layer material makes a tough, durable, maintenance-free, low cost hull. A foam core provides integral flotation and stiffness. High density linear polyethylene skins provide superior impact protection and are repairable. Triple Tough hulls are a little heavier than Royalex but offer similar performance characteristics. Our TT canoes are fitted with vinyl gunwales and web or plastic seats.

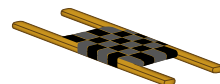

### Polyethylene

The Adventure 14 and 16 are moulded from linear high-density polyethylene. Polyethylene has excellent abrasion and impact resistance but if unsupported is too flexible for efficient paddling. So the hull, gunwales and seats are all moulded in one piece, which provides the necessary rigidity. The result is a very tough and virtually maintenance free hull, with simple plastic gunwales and seats at a very modest price.

### Web seats

Traditional flat ash framed seat with woven web seating. More durable than a cane seat.

### Plastic seats

Simple, strong and comfortable. Rotomoulded polyethylene are ideal for groups or for hire fleets.

### Third centre seat

The Explorer and Journey are both available with an optional factory fitted webbing seat in the middle, replacing the yoke.
